

Introduction

Seattle Department of Transportation's Street Use Inspection Unit provides a variety of services to Applicants in the Street Improvement Permit process. Depending on the complexity and magnitude of the project, a number of design disciplines and stakeholders located in numerous departments can be involved. Involvement of the subject matter experts can include applicant assistance in determining permit/design requirements (Pre-Application/Application assistance), review of design submittals (Review/Corrections processes), and specialty inspections during construction (including Acceptance of Completed Project).

Examples of the various design and specialty subject matter experts that could be involved in a Street Improvement Permit project (depending on the impacts to the public infrastructure) can include:
